THERAPEUTIC METODS:

Massage heals you physically, mentally, and spiritually. It also improves the function of the Circulatory system, Lymph, Muscle and Skeletal systems. It helps to reduce pain and discomfort from muscle spasms, strains, and reduces, surgical recovery time.

More and more doctors and specialist are referring their patients to massage therapists and/or contracting therapists in their offices because they see the healing benefits for their patients.

Reiki ~ Life force flows within the physical body though pathways called Chakras, or Meridians. It also flows around us in a field of energy called the Aura. The life force nourishes the organs and cells of the body, supporting them in their vital functions. When this flow of life force is disrupted, it causes diminished function in one or more of the organs and tissues of the physical body.

Reiki heals by flowing through the affected parts of the energy field and charging them with positive energy. It raises the vibratory level of the energy field in and around the physical body where the negative thoughts and feelings are attached. This causes the negative energy to break apart and fall away. In so doing, Reiki clears, straightens and heals the energy pathways, thus allowing the life force to flow in a healthy and natural way.
